Artem Kharin

Quality Assurance Engineer
Chicago, IL | +1 (224) 935-7897 | artemharin1985@gmail.com
https://www.linkedin.com/in/artem-kharin-6144167b/

Professional Summary

QA Engineer with 10+ years of experience in software quality assurance, including 2+ years focused on test automation. Specializes in designing scalable automation frameworks using Selenium WebDriver, C#, and NUnit within Agile environments. Experienced in leading QA efforts for web, desktop, and mobile applications, with a proven ability to improve testing efficiency, reduce release cycles, and ensure high-quality software delivery. Combines strong technical expertise with strategic thinking and cross-functional collaboration.

Core Competencies

- **Automation & Testing**

Selenium WebDriver | C# / .NET | NUnit Framework | API Testing (Postman) | Page Object Model (POM) | Performance Testing (JMeter)

- **Tools & Platforms**

JIRA, Confluence | TeamCity, Jenkins | Git, GitHub | MySQL | TestRail, Zephyr | Visual Studio

- **Methodologies**

Agile / Scrum | SDLC / STLC | Functional, Regression, Smoke Testing | End-to-End (E2E) Testing | User Acceptance Testing (UAT) | Cross-Browser Testing | CI/CD Integration

Education

Master’s Degree in Programming of Automated Systems
Vinnytsia National Technical University | Vinnytsia, Ukraine
2007 – 2008

Bachelor’s Degree in Computer Science
Vinnytsia National Technical University | Vinnytsia, Ukraine
2003 – 2007

Languages

English: Fluent (professional working proficiency)
Ukrainian: Native
Russian: Proficient

Professional Experience

- **Senior QA Engineer** Revenue Grid | Chicago, IL (Remote / Hybrid)
  2018 – Present

Designed and implemented a scalable UI automation framework using Selenium WebDriver, C#, and NUnit, reducing regression testing time by 30% and enabling parallel test execution across multiple environments.
Maintained and expanded an automated test suite of 500+ tests, integrated with TeamCity for continuous execution, improving early defect detection and release confidence.
Led testing efforts for Outlook and Gmail add-in extensions, covering functional, regression, smoke, and end-to-end testing across web and desktop platforms.
Conducted API testing using Postman to validate RESTful services, ensuring data integrity and seamless integration between frontend and backend components.
Managed defect lifecycle in JIRA, collaborating with developers, product owners, and designers to prioritize issues and reduce average bug resolution time by 20%.
Performed performance testing to identify system bottlenecks, optimizing application responsiveness under load.
Mentored and onboarded 3 junior QA engineers, providing guidance on automation best practices, test design, and framework maintenance.
Participated in daily stand-ups, sprint planning, and retrospectives, contributing to continuous process improvements and cross-functional alignment.

- **Senior QA Engineer** | XCDS | Kyiv, Ukraine
  2016 – 2018

Led iOS application testing across the full lifecycle, from requirements analysis to execution and reporting.
Contributed to the development of an automation testing framework for web and Unity3D components, reducing manual testing efforts.
Conducted functional, regression, smoke, performance, and API testing (Postman) across iOS, Android, macOS, and Windows platforms.
Managed defect lifecycle in JIRA, collaborating with developers, product managers, and designers.
Mentored junior QA engineers and owned the end-to-end testing process, ensuring high-quality deliverables.

- **Middle QA Engineer** | Ciklum | Kyiv, Ukraine
  2015 – 2016

Performed manual testing (regression, smoke, functional, UI/UX) for desktop and Unity3D applications.
Collaborated with product management and development teams to validate requirements, assess risks, and create test plans.
Designed and maintained test documentation for Unity3D projects; contributed to automation test documentation.
Managed defect tracking and resolution, ensuring timely communication across teams.
Played a key role in developing an automation testing framework for Unity3D components, streamlining testing workflows.

- **QA Engineer** | Samsung R&D Center | Kyiv, Ukraine
  2013 – 2015

Developed and executed manual test cases for Android, iOS, and desktop applications, covering functional, regression, smoke, and performance testing across multiple product releases.
Designed and maintained test documentation, including test plans, checklists, and test suites using TestRail and Zephyr.
Performed UI/UX, compatibility, and end-to-end testing across mobile and desktop platforms.
Collaborated with development teams to reproduce, report, and resolve defects, improving communication and reducing rework.
Contributed to the development of an automation testing framework for Unity3D components, increasing test coverage for interactive features.
Created and managed test data for shape and text recognition validation, ensuring accuracy across testing scenarios.
